Adolph, E. F.	113
Alvares, Olaf F.	57
Bal, H. S.	15
Barrington, Erwin P.	57
Bloch, M.	145
Booth, F. W.	177
Boyd, E. M.	99
Brasel, Jo Anne	197
Brown, R. G.	369
Burke, J.	359
Chen, C. P.	99
Cosgriff, Thomas M.	187
Getty, R.	15, 321
Gross, Jack	145
Grover, N. B.	145
Hancock, R. L.	209
Hazel, L. N.	419
Heald, Felix P.	257
Herbst, J. J.	359
Hirschfeld, William J.	129, 385, 431
Howard, Alma	87
Hunt, Sara M.	257
Inch, W. R.	271
Irvin, Ronald	31
Kahn, Alfred J.	215
Kidwell, J. F.	87
Koldovsky, O.	359
Koppang, H. S.	321
Lambourne, L. J.	235
Lee, H.	437
Lesh, Georgia E.	31
McCredie, J. A.	271
Meyer, Julia	57
Miller, Elizabeth	379
Miller, R. L.	385
Muis, L. F.	99
Mulder, J. B.	401
Nash, Donald J.	75
Perlmutter, Alfred	153
Peterson, Roy R.	283
Platt, R. E.	401
Poprycz, W.	437
Rennert, O. M.	209
Rier, John P.	341
Robinson, D. W.	235
Rosato, F. E.	379
Roseman, J. M.	379
Schulz, Jörg K. R.	31
Seltzer, M. H.	379
Siers, D. G.	419
Sikov, M. R.	1
Sudarsanam, Anam	187
Sunshine, P.	359
Sutherland, R. M.	271
Swain, Lenard W.	341
Thomas, J. M.	1
Tinsley, O. W.	401
Tipton, C. M.	177
Trenkle, Allen	313
Trotter, Mildred	283
Tumbleson, M. E.	401
Van der Linden, Frans	225, 385
Welch, Q. B.	293
Winick, Myron	197
Wolff, D. E.	379
Young, L. G.	369
Yu, Man-lim	153

Subject Index, Vol. XXXIV, 1970

	Page
Actinomycin D, effect on explanted chick embryos	437
Actinomycin-treated embryos, vesicle formation in	452
Adult transfer RNA	209
Analysis and prediction of growth	139
Analysis of group data induced negative correlation effect	390
Analysis of height in human subjects	296
Auxin (IAA), influence on bacterial tumor morphology	341
Bacterial tumors, effect of auxin on	341
Basal cells in rat epithelium	59
Body composition of growing rats	257
influence of source of non-protein calories on	257

XUM

	Page
Bone density, relation to race, sex, age	288, 290
comparison of fetal and adult	289
Bone volume, method for determining	285
Bones of fetal skeleton	283
Book Reviews	127, 227-231
	353, 455-459
Brachydanio rerio	153
growth inhibition of	153
Brain weights of miniature swine	407
Broad ligament in swine uterus	27
Carcass measurement in steers	315
Carcinomas, nodular, growth in rodents	271
Casein diet, effect on weanling rats	99
Cattle, growth and carcass characteristics of	313
Cell proportions in rat epithelium	62
Cell shapes in rat epithelium	59
Cell volume in rat cheek	58-66
Cellular layers in rat epithelium	70
CF_1 mice	215
hemoglobin concentration in	215
C 3H/HeJ mice	272
as hosts for syngeneic carcinoma	272
Chick embryos,	
effect of Actinomycin on	437-442
effect of ribonuclease on	448
Chick embryos, explanted,	442
effect of Actinomycin on	443
Chinese hamster cells in tissue culture	273
initial growth and retardation constants for	275
Composition of mice as a function of body weight	242
body	244
skeletal muscle	245-249
Computer analysis of growth	145
Connective tissue metabolism in swine	369
Cortisone,	
effect on DNA, RNA and protein	365-366
Cortisone-treated rats	359
Craniofacial growth, analysis of	431
regression equations for	433
Crown gall differentiation	343
effect of auxin on bud and tumor growth	344
Density of bones in fetal skeleton	283
Development of bacterial tumors	345-346
Development of mammals	
physiological stages of	113
stagemarks for	114
Dietary protein intake of weanling rats	103
Distance curves, error of method of calculating	359
DNA in intestinal mucosa	359
Dry weight of cells in rat cheek epithelium	57
Effect of L-fucose on cell lines in tissue culture	382
Elastin,	
age related levels of	369, 374
Embryonic remnants in swine uterus	21
Embryonic transfer RNA	209
Endometrium,	
growth in swine uterus	16-18
mean thickness of	29
Exponential smoothing methods applied to analysis of growth	129, 132

XUM

Page

External control of growth of Hydra
effect of ouabain on 39, 46
influence of ions on 48, 50
Fetal skeleton, density of bones in 283
comparison within each sex-age group 288
Fitting second- and third-degree polynomials 301
Food efficiency ratio of rats on varying levels of protein 265
Genetic applications of growth data 307
Gompertz growth curves for fetal rat 9
Growth,
analysis at short time intervals 386
analysis by exponential smoothing methods 129, 132
analysis by time series methods 129, 132
Growth,
craniofacial 431
decelerated 396
errors in measurement of 388
Growth curves,
Gompertz 9
interpretation of 221
smoothing of 395
theoretical model for 223
Growth curves, fitting
group comparisons 293
method 308
for height 300
for other traits 306
Growth data
dependence and independence of 391
analysis of 385
Growth equation, logistic 12
Growth hormone levels correlated with carcass traits 428
Growth hormone levels correlated with growth rate 428
Growth increments 221
hypothetical 222
Growth of
cancer cell fraction of spontaneous tumor 277
C 3H and C 3HBA transplants in mouse 277
initial constant 278
Chinese hamster spheroids in culture 277
initial constant 278
growth curves for 279
Hydra 31
internal control of 35, 39
mouse 81
in genotype subclasses 90
orthogonal polynomials for 87
nodular carcinomas of rodents 271
rat 145
computer analysis of 145
female, effect of terephthalic acid on 149
prenatal 1
swine
postnatal uterus of 371
X-irradiated mice 75
mathematical model for 76
statistical analysis of 77
Growth parameters
interpretation of 297
of female rat 151

XUM

Page

Growth patterns
deviation from 393
Growth performance of rats on various levels of protein 264, 267
Growth rate of skeletal muscles
influence of nucleic acid concentration on 235
influence of nitrogen concentration on 235
"Growth spurt," definition of 396
Heart weight of mice following x-irradiation 78
Height-growth parameters 305
intercorrelations for parent-offspring groups 305
Hemoglobin levels in offspring of CF_1 mice 218
Hexosamine, age related levels of 369
Histology of parotid gland of pigs 324-334
Histomorphological studies of porcine parotid gland 321
Hormone level determinations in swine 427
Hydra littoralis 32
Hydra viridis 45
culture methods for 33
growth of 31
Hydroxyproline 369
age related levels of 372, 373
in the aorta 376
Hypothyroid rats 204
Indole-acetic acid 347
effect on development of plant tumors 348
Inhibitory effect of L-fucose on mammary carcinoma 381
Ionic control of growth of Hydra 32
Jejunum and ileum 362
protein content of 363
Keratin layer in rat epithelium 59, 71
Kidney weight of mice following x-irradiation 83
L-fucose as an inhibitor of mammary carcinoma 379
Liver weight change in mice 250
following x-irradiation 79
Liver weights in miniature swine 414
Logistic growth equation for fetal rat 10-12
Longitudinally collected growth data 385
optimal evaluation of 397
statistical methods for 393
Lycopersicon esculentum 342
Mammalian development
physiological stages in 113
Mammary carcinoma, rat 379
tissue culture of 379
Mathematical growth models 5
Mean body weight of mice following x-irradiation 85
Mesonephric duct of swine 87
Miniature swine
food consumption of 405
temperatures of 406
Mouse mammary carcinoma 272
growth of transplants 274
relative volume of cells 275
Mouse muscle, chemical analysis of 239
Mucosa of rat cheek 60
Multi-cell spheroids in tissue culture 271, 276
Myometrium, growth in swine uterus 18-20
histology of 24
mean thickness of 29
Nodular structures in syngeneic tumors 276

XUM

	Page
Non-collagen protein levels in uterus and aorta	369, 375
Nucleic acid solutions, extinction coefficients of	241
Organ weight response in x-irradiated mice	75
Ouabain	
influence on ion exchange	40
influence on internal growth of Hydra	39, 41
Ovum weight of rat	10
Palate of rat	68
Parotid gland of mice	321
Parotid gland of newborn pigs	323-325
Pathological changes in rats fed casein diets	101
Plant tumors treated with IAA	347
Plasma hormone levels	
correlation with body weight gains	317
correlation with growth and carcass characteristics	313
in cattle of different ages	315
Polynomial coefficients	302
mean standard deviations and correlations	304
Porcine growth hormone	419
labeling of	420
immunoassay of	421
Porcine serum damage values	426
Prenatal growth of rat	1
Protein in rat mucosa	361
Radioactive amino acyl-transfer RNA, formation of	212
Radioimmunoassay of porcine growth hormone	423
Rat,	
body composition	257
influence of diet on	259
epithelium	59
volume and dry weight of cells in	57
female,	
effect of terephthalic acid on	149
fetus	
dimensions of structures	3
specific growth rates	5
structures at various gestation times	4
growth, computer analysis of	145
mucosa during development	309
prenatal growth of	1
cube root of weight	8
polynomial regression of	8
Rats, albino	
influence of casein diets on	99
Rats, cortisone-treated	359
Rats, Sprague-Dawley	2
Rats, Wistar	360
Review of ONCOLOGY	175, 225
RNA, transfer, adult and embryonic	209
Serum growth hormone levels in swine	419
Skeletal muscles of mouse	235
Smoothing growth curves	395
Spencer and Coulombe, cube root model for growth	5
Spinous layer in rat epithelium	59
Spleen weight	
of mice	19
of miniature swine	411
Sprague-Dawley rats	2, 272
mean body composition of	260-263

XUM

Page

Stagemarks in development of six species of mammals 115
interpolations among 120
species comparisons of 121
Starvation, effect of casein diets on 101
Starved rats,
clinical measurements of 104
pathological lesions of 105
wet weight of body organs of 107
water content of organs of 109
Swine,
body and organ weights 401-403
brain weights 407
breeds of 322
connective tissue metabolism in 369
growth of 371
hormone levels in 419
mean body weights 404
miniature, undernutrition in 401
strains of 28
uterus,
endometrial growth in 16
prenatal growth of 15
Sydney white mice 237
Temperature control of growth in Hydra 31, 40
Terephthalic acid, effect on rat growth 149
Testes weights of mice following x-irradiation 62, 79
Tibia weights in miniature swine 413
Time series methods applied to growth analysis 129, 131
compared with regression methods 135
Transfer RNA
in adult bovine liver 211
in fetal bovine liver 211
Trichogaster trichopterus
growth inhibition of 153
Undernutrition in miniature swine 401
Uterine glands, differentiation and development in swine 19
Uterine wall, mean thickness of 29
Uterus of primates, histology of 23
Velocity curves of an oscillating type of growth 387
error of the method of correlation 289
Villi and crypts of rat mucosa 361
Volume of cells in rat cheek epithelium 57
Walter 256 carcinoma 272
growth of 274
Weight as a function of age in the male rat 147
Weights of cattle 315
Whole body composition of mouse 235
Zebrafish, growth of 153
